

I'm e-mailing in regards to LPFM and how this will affect K-LOVE. I used to listen to Rock stations for years and Now it's considered Classic Rock. Over the years the music and the DJ's have become more vulgar that I no longer enjoy listening to the radio. A couple years ago I heard about K-LOVE and decided to give it a try. Finally there is one radio station that can be played at any volume that doesn't offend anyone. If you go through with your plan it will have an adverse effect on the local community here since it's the only encouraging radio station on the air. I did one tour of recruiting for the US Navy and I was shocked at how far we have regressed as a society. I listened to what the teenagers were listening to and how everything is acceptable now a days. When I intervied 17 year olds and asked them about drugs, it was common for them to have used cocaine and then you listen to the music and see how much anger is written in the lyrics how it's OK, FCC we have a Problem. We need to take a stand and show them that there is an altenative to living like animals and we have to do it quickly. K-Love is one radio station that helps refoucs their attention. In the 60's it was FREE LOVE, today and in the future it has to be K-LOVE if we don't want to be the next Roman Empire. Thanks for your Time. Pete C. Lozano
